# What Scores on Building Day

After reset, Tuesday is **Building Day in Alliance Duel**.

The goal is not simply to complete as many random actions as possible. The State 775 guidance emphasizes choosing the **highest-value actions** and saving them for Tuesday.

## What Scores on Tuesday

The supplied guidance lists:

- **Orange Bounty Missions**
- **Orange Refugees**
- **Purple Refugees**
- **Blue Refugees**
- **Building Speedups**
- **Structure Power**

## Orange Bounties Are the Priority

The biggest takeaway from the State 775 guidance is the value of an **Orange Bounty Mission**.

According to the supplied information:

“ **One Orange Bounty Mission is worth the same as 25 hours of Building Speedups.**

That makes choosing the right bounty extremely important.

Instead of settling for a low-value bounty, use your refreshes to look for **Orange**.

## Refugees Matter Too

Refugees also provide a major scoring opportunity.

According to the supplied guidance:

**“ One Orange Refugee beats 20 Blue Refugees.**

So don't simply recruit the first refugee available when you have an opportunity to refresh for a better one.

## Tuesday Priority Order

Use this priority:

- 1. Orange Bounty Missions**
- 2. Orange Refugees**
- 3. Building Speedups**
- 4. Everything Else**

# How to Prepare for Tuesday

Building Day preparation starts **before Tuesday arrives**.

## 1. Save Bounty Refresh Tickets

The State 775 guidance recommends saving:

### **20-40 Bounty Refresh Tickets**

during the week.

On Tuesday, use those tickets to refresh your available Bounties while looking for:

### **ORANGE BOUNTY MISSIONS**

Don't automatically accept a Blue Bounty just because it's available.

## 2. Hold & Refresh Refugees

Use the same basic strategy with Refugees.

Prioritize:

**Orange → Purple → Blue**

If you have the ability to hold or refresh for a higher-quality Refugee, take advantage of it.

Orange Refugees are considerably more valuable according to the supplied scoring guidance.

## 3. Don't Finish a Building on Monday

Have an important construction upgrade almost ready?

## **HOLD IT.**

Don't complete it Monday simply because the timer has finished.

If possible, leave the completed upgrade waiting and finish it after Tuesday begins so the Structure Power can contribute toward Building Day.

That may mean waiting a little longer for the next HQ or building level, but you're preserving an opportunity for additional Alliance Duel rewards.

## 4. Stockpile Building Speedups

Save Building Speedups throughout the week.

Then use them on:

### **Tuesday — Building Day**

instead of spending them randomly as soon as you receive them.

# Tuesday Scoring Routine & Full Preparedness

Tuesday gives you an opportunity to combine **Alliance Duel Building Day** with **Full Preparedness**.

## Find Your Two Windows

According to the supplied State 775 guidance:

**Full Preparedness runs Shelter Upgrade twice on Building Day.**

These are the windows you want to identify before spending your saved construction resources.

## Check the Full Preparedness Calendar

Use the Event Calendar to determine when **Shelter Upgrade** occurs in your local time.

Don't rely on somebody else's clock or time zone.

Check your own calendar.

## Why the Windows Matter

When the applicable events overlap, the same spending can contribute toward:

## Alliance Duel Points

**AND**

# Full Preparedness

That's the strategy:

**One action → progress toward two rewards**

Spending those resources outside the appropriate Full Preparedness windows may still provide Alliance Duel value, but you give up the opportunity to also use that action toward the overlapping Full Preparedness objective.

## Your Tuesday Routine

### 1. Check the Event Calendar

Find both **Shelter Upgrade** windows.

### 2. Prepare your Orange Bounties

Use saved refresh tickets to search for Orange.

### 3. Prioritize Orange Refugees

Refresh or hold for the best available Refugees.

### 4. Complete saved building upgrades

Finish upgrades you've intentionally carried into Tuesday.

### 5. Use Building Speedups

Spend the speedups you've stockpiled during the week.

### 6. Watch your reward progress

Don't spend resources blindly. Pay attention to what you need to reach your next reward milestone.

# Tuesday Mistakes & Final Checklist

## Four Building Day Mistakes

### ❑ Doing Blue Bounties Instead of Refreshing for Orange

If you have refresh tickets available, don't immediately settle for Blue.

**Look for Orange.**

### ❑ Recruiting Refugees on the Wrong Day

The supplied State 775 guidance specifically warns against using valuable Refugee opportunities on Wednesday instead of saving them for Tuesday's Building Day strategy.

### ❑ Finishing a Building on Monday

If an important building can safely wait until Tuesday, completing it Monday means its Structure Power won't contribute toward Tuesday's Building Day.

### ❑ Spending Outside the Full Preparedness Windows

Check the calendar before unloading your saved resources.

The goal is to make your actions work toward **both Alliance Duel and Full Preparedness** whenever the objectives overlap.

---

# Research Tip — Alliance Recognition

The State 775 guidance also recommends focusing research toward:

## Alliance Recognition

The supplied advice says this increases the value of your Alliance Duel activity and benefits alliance progression.

This is a longer-term investment rather than something you only think about on Tuesday.
