

How to Prepare for Tuesday

Building Day preparation starts **before Tuesday arrives**.

1. Save Bounty Refresh Tickets

The State 775 guidance recommends saving:

20-40 Bounty Refresh Tickets

during the week.

On Tuesday, use those tickets to refresh your available Bounties while looking for:

ORANGE BOUNTY MISSIONS

Don't automatically accept a Blue Bounty just because it's available.

2. Hold & Refresh Refugees

Use the same basic strategy with Refugees.

Prioritize:

Orange → Purple → Blue

If you have the ability to hold or refresh for a higher-quality Refugee, take advantage of it.

Orange Refugees are considerably more valuable according to the supplied scoring guidance.

3. Don't Finish a Building on Monday

Have an important construction upgrade almost ready?

HOLD IT.

Don't complete it Monday simply because the timer has finished.

If possible, leave the completed upgrade waiting and finish it after Tuesday begins so the Structure Power can contribute toward Building Day.

That may mean waiting a little longer for the next HQ or building level, but you're preserving an opportunity for additional Alliance Duel rewards.

4. Stockpile Building Speedups

Save Building Speedups throughout the week.

Then use them on:

Tuesday — Building Day

instead of spending them randomly as soon as you receive them.

Tuesday Preparation Rule

SAVE NOW. SPEND TUESDAY.
