

The Prime Recruit Trick

Prime Recruit gives Thursday another way to squeeze more value from the same resources.

Recruit on Thursday

According to the supplied State 775 guidance, doing your **Prime Recruits on Thursday** allows you to score from two related actions.

First — Recruit

Perform your Prime Recruit on Hero Day.

You receive scoring from the recruit action.

Second — Spend the Fragments

Your recruit gives you Hero Fragments.

Instead of saving those newly obtained fragments for another day:

Spend them Thursday.

That gives you another scoring action from the resources the recruit just provided.

The Prime Recruit Trick

**PULL → GET FRAGMENTS → SPEND
FRAGMENTS**

The supplied guidance describes this as scoring twice from the same sequence:

Once from recruiting.

Again when spending the Hero Fragments you received.

Where Should Those Fragments Go?

Don't spend them simply because you have them.

Keep Thursday's other major rule in mind:

Focus on your first formation.

Your most valuable resources should strengthen the five heroes you're actually using.

If one of your main heroes still needs to reach the important **4-Star breakpoint**, that should be considered before pushing another hero farther ahead.

Page 3 Rule

PULL THURSDAY. SPEND THURSDAY.

And strengthen the heroes you actually field.
